CRAIG GRAB BUCKET 2

The Craig Grab Bucket 2 is our version of our Craig Grab Bucket. The most exciting feature is the helical actuator that replaces standard cylinders, making the attachment more reliable and stronger than ever. The Helical Actuator can produce up to 54,000 foot-pounds of torque at 3000 PSI. This means a continuous grip throughout the bucket's rotation. The thumb is directly mounted on the bucket, you can drop the entire attachment in one piece. This design uses Hardox 400 plate which allows for longer wearability and service life.

- Built with a helical actuator to provide a steady grip with no exposed cylinder shafts
- Pin-on hook-ups are align bored to OEM tolerances
- Various GET brands available to meet your specifications
- Thumb and bucket teeth inter-mesh
- Install is easy with no welding required
- Switch between machinery quickly for maximum productivity of your fleet
- AR 400 construction designed to provide a long service life
- Perfect for picking, sorting, and transferring material
- No exposed cylinder shafts to be damaged
