

The choice is yours

Join the open standard for
automatic quick couplers

OPEN | 

 **CRAIG**[™]

The future for automatic quick couplers is open.

With an open standard for quick couplers for excavators, machine contractors can be confident that products from different manufacturers will work together.

Dealers can provide clearer information about which products fit together.

DEVELOPMENT

Choose from different manufacturers

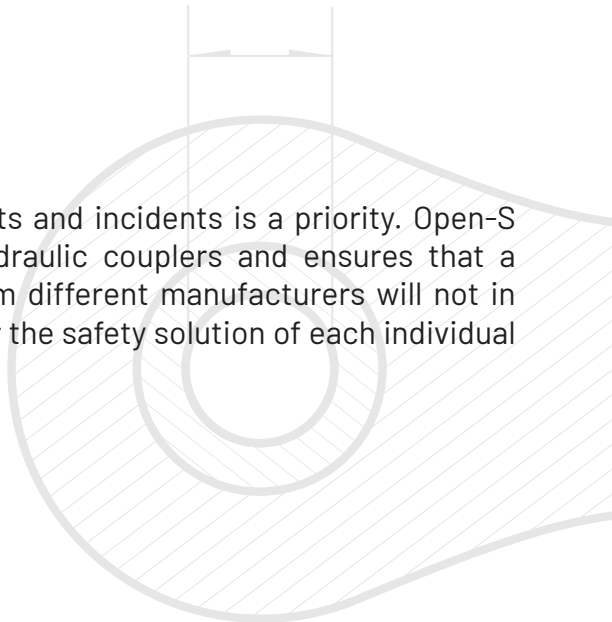

A healthy competition is the best way to promote continuous product development and customer benefits. With a common standard, it's easier for industry manufacturers to continue to compete with performance and functionality, and still offer customers compatibility. Open-S opens the door to the future.

SAFETY

Safety first

Reducing the risk of accidents and incidents is a priority. Open-S defines the interface for hydraulic couplers and ensures that a combination of products from different manufacturers will not in any way interfere with or alter the safety solution of each individual product.

Do you also believe the future should be open?

Become an Open-S partner

The Open-S Alliance welcomes all manufacturers and dealers in the industry to apply for membership. We believe that a joint effort for an open standard is the best way to ensure further development in the industry, as well as more efficient and safe day-to-day operations for contractors and excavator operators.
